

FUND OBJECTIVE

The Global X MSCI China Energy ETF (CHIE) seeks to provide investment results that correspond generally to the price and yield performance, before fees and expenses, of the MSCI China Energy IMI Plus 10/50 Index.

For informational purposes only. This document should be used to highlight some of the criteria to be used by index provider when publishing index constituents and is not comprehensive.*

KEY FEATURES

Targeted Exposure

ETF Efficiency

All Share Exposure

MSCI CHINA ENERGY IMI PLUS 10/50 INDEX

SELECTION POOL

- Constituents of the parent index, the MSCI China Index (ticker: MXCN)
 - H shares, B shares, Red chips, P chips, A shares, and ADRs/GDRs are eligible; A shares are limited to listings that are currently in the Stock Connect programs
 - Large-, mid- and small-capitalization companies, which generally represent approximately 99% of the free float-adjusted market capitalization of the China eligible universe
 - As of November 2019, A share stocks are included at 20% of their free float-adjusted market capitalizations
 - To ensure a minimum number of issuers in the Index, the Index may also include securities classified in the Energy sector from developed countries in the Asia Pacific region with exposure to China as defined by the MSCI Economic Exposure Data methodology
 - All components must have a 3-month Annual Traded Value Ratio and 12-month Annual Traded Value Ratio of 15%, as well as a 3-month Frequency of Trading of 80% over the last 4 consecutive quarters
 - Securities will not be eligible for inclusion if they:
 - Are suspended on the Price Cutoff Date of the Index Review
 - Have been suspended for 50 consecutive days or more in the past 12 months

SELECTION

- Companies that are constituents of the MSCI China IMI Index on the selection date and have a GICS classification of Energy

WEIGHTING SCHEME

- Index is free float-adjusted market capitalization weighted
- The weight of the largest group entity (defined by MSCI as companies with a controlling stake owned by one entity) is capped at a 10% weight
- A total weight cap of 50% is applied to the sum of the weights of all group entities with weights greater than 5%

REBALANCES/REVIEWS

- Quarterly rebalance on the last business day of February, May, August, and November

*For the complete and current index methodology please refer to the index provider's website. This summary document is accurate as of the time of its publication and Global X does not guarantee that it is current at any point thereafter.

The selection of the index constituents and their weighting is made by the index provider at its sole discretion.

Carefully consider the fund's investment objectives, risks, and charges and expenses. This and other information can be found in the fund's full or summary prospectus, which may be obtained by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Securities focusing on a single country and narrowly focused investments may be subject to higher volatility. CHIE is non-diversified.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
