

### REASONS TO CONSIDER

#### Growth Potential

Following a strong rebound from the pandemic, Portugal's GDP grew at a rate exceeding 6.5% in 2022. While forecasts suggest a slight downturn of 0.7% in 2023, the rate is expected to grow again to more than 1.5% in 2024.<sup>(1)</sup>

#### Targeted Exposure

The ETF targets exposure to a single country.

#### Efficient Access

PGAL delivers efficient access to a broad basket of Portuguese securities.

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized. [Click here](#) for standard performance as of the most recent quarter-end.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
